

## Degagne Carpentry

In 1988 Marcel Degagne started a small business building and repairing homes. Never did he think that the act of starting small would lead to where he and his partners are today.

Marcel and his son Dan now co-own Degagne Carpentry, along with corresponding businesses that they procured along the way. Partnerships have developed with Gus Restoration (purchased in 2016), Profound Electric (2020), and the Degagne/Lefebvre Building Group (2020). These businesses are known best for their organizational skills, top quality and brief timelines. Degagne Carpentry is driven to build, and support our community.

We spent some time with Dan and asked him to relay a few words of wisdom to other business owners in East Ferris. "Being a business owner is a huge learning experience. It is important to have patience. It is equally, or more important to learn from, listen and deliver to your clients".

Dan beamed when he spoke of his fantastic project managers as well as all of his employees, and thanked them profusely for their dedication and hard work.

Up next for Degagne Carpentry et al? Their main office will be on the move to Corbeil Road, and will house all of the Degagne partnered businesses. You may have noticed some machinery there? Keep an eye out - they are excited to offer topsoil originating from, and processed on Corbeil Road beginning in 2022!
