

North Bay Woodwork Ltd.

For 33 years the Boileau family has operated North Bay Woodwork from inside city limits, and now they've moved to Corbeil!

Manuel Boileau and Brianna Dempsey took over the business from their father 5 years ago and have been working at expanding the business. They discovered that Corbeil would make an excellent fit to suit their needs. North Bay Woodwork is a millworking company that creates and installs custom built cabinets, countertops, vanities, walk-in closets and more, all while taking the environment into consideration. They have recently installed a geothermal system for heating and cooling, switched to water-based products and purchased innovative energy efficient equipment. They will provide you with products and services that have the lowest impact on our planet all without sacrificing product quality.

North Bay Woodwork is now proudly operating out of their renovated location at 1945 Corbeil Road, and they plan to hire several employees to help continue with the expansion of the business and provide the best possible products for their clients.

Contact them today by calling 705-474-0947, or emailing Brianna.nbw@gmail.com

Welcome to East Ferris! We are happy you are here!
